# The Ayesha Morning

Wednesday, 14 October 2026 BACKFILLED EDITION 12 stories · 18 sources

1 source articles could not be read today; those stories show headlines and links only.

**THREE THINGS TO KNOW**

1. Local AI and hardware modding are creating an existential challenge for centralized tech giants.
2. Georgia Tech launched a $20 million supercomputer named Nexus to advance weather and healthcare research.
3. Major UK retailers including H&M and Asos have been hit by a series of cyber attacks.

# Local AI and Hardware Modding Threaten Big Tech's Centralized Monopoly

As open-source models shrink and hardware modders expand local compute capacity, centralized artificial intelligence giants face an existential challenge to their business models.

- Modders and engineers are upgrading consumer graphics hardware with expanded VRAM to bypass corporate pricing and export restrictions. [naturalnews.com]
  > “desoldering memory and adding double-density VRAM to cards like the RTX 2080, turning it into a 22GB card”
- Optimization advances and efficient model designs allow powerful artificial intelligence systems to run on standard gaming rigs instead of expensive enterprise servers. [naturalnews.com]
  > “A 12-gigabyte gaming GPU can now run a model like Qwen 27B, which means you do not need a $20,000 workstation”
- Centralized technology leadership has responded to the spread of open-source models by pushing for strict government oversight. [naturalnews.com]
  > “Amodei has aggressively lobbied for stringent government regulation, arguing that without such controls, artificial intelligence poses an existential threat.”
- Massive corporate valuations in artificial intelligence remain vulnerable because they depend on keeping access restricted while local alternatives become widely accessible. [naturalnews.com]
  > “The centralized AI valuations are fragile precisely because they depend on keeping you locked out.”

In the image: A man solders hardware at a home table beside an open PC tower while a nearby corporate glass skyscraper shatters dramatically with loose papers flying through the air.

**TECHNOLOGY INDUSTRY**

## Georgia Tech Unveils $20 Million Supercomputer Named Nexus

Georgia Tech has debuted Nexus, a $20 million supercomputer at Tech Square designed to advance weather forecasting, healthcare research, and medical twinning.

- Georgia Tech introduced a $20 million supercomputer called Nexus during a ribbon-cutting event at the Tech Square campus. [atlantanewsfirst.com]

  > “Georgia Tech unveiled a $20 million supercomputer Monday during a ribbon-cutting ceremony at its Tech Square campus.”

- The supercomputer will support medical research through 'twinning,' creating an artificial intelligence replica of patients to forecast treatment outcomes. [atlantanewsfirst.com]

  > “Nexus will support medical research through a process Georgia Tech experts call “twinning,” which uses an AI replica of a patient”

- Nexus will also aid weather modeling to provide advanced warning and detailed predictions regarding approaching hurricanes. [atlantanewsfirst.com]

  > “Where it’s going to make landfall, how intense it is going to be, and what rainfall is going to be”

- Through the National Science Foundation, the supercomputer will be accessible for outside use to democratize advanced computing. [atlantanewsfirst.com]

  > “Through the U.S. National Science Foundation, Nexus will be available for outside use — an approach Georgia Tech officials described as “democratizing computing.””

In the image: The image shows a row of industrial server racks in a data center environment, illustrating the physical housing of powerful computing hardware like Nexus.

## UK Retailers Hit by Spate of Cyber Attacks

Experts warn that recent cyber attacks on major retailers like H&M, Asos, and TFG London serve as a brutal alarm call for corporate security.

- Retailers across the UK have faced numerous cyber attacks recently, prompting warnings from experts. [leighjournal.co.uk] [somersetcountygazette.co.uk] [dunfermlinepress.com] [thenorthernecho.co.uk]

  > “Retailers across the UK have faced a spate of cyber attacks in the past week, prompting experts to warn the incidents should act as a “brutal alarm call”.”

- The owner of Hobbs and Whistles apologised to customers following a cybersecurity incident affecting certain IT systems. [leighjournal.co.uk] [somersetcountygazette.co.uk] [dunfermlinepress.com] [thenorthernecho.co.uk]

  > “The owner behind womenswear brands Hobbs and Whistles apologised to customers on Tuesday after being hit by a cyber attack.”

- Asos confirmed that an unauthorised party gained access to personal data, including names and contact details. [leighjournal.co.uk] [somersetcountygazette.co.uk] [dunfermlinepress.com] [thenorthernecho.co.uk]

  > “Fast fashion retailer Asos last week said an “unauthorised

> party" had gained access to some personal data, including names and contact details."

- Marks & Spencer faced severe logistics and online sales disruption after being targeted by hackers around Easter. [leighjournal.co.uk] [somersetcountygazette.co.uk] [dunfermlinepress.com] [thenorthernecho.co.uk]

  > "The high street chain was forced to stop all online sales for about six weeks and had empty shelves because of disruption to its logistics systems"

In the image: A retail aisle with entirely empty shelves and a store worker walking away, illustrating the logistical fallout mentioned in the text.

# Tech and Energy Profits Mask Slowing Growth Across the S&P 500

While earnings season kicks off strongly for major sectors, growth outside of tech and energy is decelerating significantly.

- The corporate earnings season has started with mixed results from major banks alongside strong numbers from Goldman Sachs. [cnbc.com]

  > "JPMorgan Chase reported a rare bottom line miss , while Wells Fargo's Q3 results were mixed."

- S&P 500 earnings growth remains near 30%, but most of that expansion stems from the energy and tech sectors. [cnbc.com]

  > "FactSet data shows year-on-year S & P 500 earnings growth is still tracking at nearly 30%."

- S&P 500 earnings growth outside of tech and energy slowed significantly in the third quarter. [cnbc.com]

  > "S & P 500 earnings growth excluding tech and energy is expected to have slowed to 7% in Q3 from 12% in Q2."

- Analysts warn that failure to meet lofty tech and energy expectations could pressure the broader market. [cnbc.com]

  > "index EPS remains highly dependent on the durability of the AI capex cycle and successful monetization"

In the image: A trader on the New York Stock Exchange floor reviewing financial data on a digital tablet amidst trading screens.

## IBM Partners With MeitY Startup Hub To Boost Indian Deeptech

IBM and the MeitY Startup Hub have signed an MoU to support India's deeptech startups with advanced technology access and mentorship.

- IBM and the MeitY Startup Hub signed an MoU to support indigenous deeptech startups by providing access to advanced technology and skilling programs.

  [telecom.economictimes.indiatimes.com]

  [hongkongherald.com]

  [coloradostar.com][shanghainews.net]

  > "IBM and the MeitY Startup Hub (MSH) on Tuesday said they have signed a Memorandum of Understanding (MoU) to support the indigenous deeptech startup ecosystem"

- The partnership focuses on key technologies including artificial intelligence platforms, hybrid cloud, and quantum computing.

  [telecom.economictimes.indiatimes.com]

  [hongkongherald.com]

  [coloradostar.com][shanghainews.net]

  > "The collaboration combines MeitY Startup Hub's nationwide innovation network and IBM's enterprise AI, hybrid cloud, and quantum computing expertise"

- A major objective of the collaboration is to identify and support promising innovators located in Tier 2 and Tier 3 cities across India.

  [telecom.economictimes.indiatimes.com]

  [hongkongherald.com]

  [coloradostar.com][shanghainews.net]

  > "A key priority will be identifying and nurturing promising innovators from Tier 2 and Tier 3 cities, broadening access to India's growing deep tech ecosystem."

## Singapore Emerges as a Regional Hub for Climate Tech Startups

Driven by government green energy ambitions and patient sovereign wealth funding, Singapore attracts the vast majority of Southeast Asia's climate tech investments.

- Singapore captured $1.3 billion in climate tech funding since 2020, representing roughly 80% of Southeast Asia's total.

  [asia.nikkei.com]

  > "The nation has attracted $1.3 billion in climate tech funding since 2020, accounting for about 80% of the total raised in Southeast Asia"

- Aether Fuels secured venture backing from Temasek-backed Xora Innovation to build its first commercial sustainable aviation fuel plant.

  [asia.nikkei.com]

  > "Aether Fuels secured seed funding from Xora Innovation and raised $34 million from a syndicate of global investors"

- The Singapore government established targets including a 1% SAF blend for departing flights by 2027 and 2 gigawatts of solar power by 2030. [asia.nikkei.com]

  > "The government has set a target of requiring a 1% SAF blend for flights departing from Singapore's airports from 2027"

In the image: The image conceptualizes Singapore as a tech-enabled global hub connected to high-tech digital circuits and financial

growth represented by glowing dollar signs.

# Egypt Partners to Support Youth Fintech Startups and Non-Banking Services

Egypt's Youth Ministry and Financial Regulatory Authority have partnered to help young entrepreneurs build and test fintech businesses using a sandbox testing environment.

- Egypt's Ministry of Youth and Sports partnered with the Financial Regulatory Authority to promote youth entrepreneurship in fintech and non-banking financial services. [cairoscene.com]

  > "Egypt's Ministry of Youth and Sports and the Financial Regulatory Authority have signed a memorandum of understanding to support youth entrepreneurship in fintech"

- During its initial year, the regulatory sandbox evaluated over 50 applicant projects. [cairoscene.com]

  > "During its first year, the FRA-Sandbox received more than 50 applications, with nine projects receiving preliminary approval and two entering the testing stage."

- Younger demographics represent the vast majority of recently registered investors in Egypt.

  [cairoscene.com]

  > "people aged 18 to 40 accounted for 80% of new investors registered on the Egyptian Exchange last year."

In the image: The image shows a smiling man in a dark suit, white dress shirt, patterned green tie, and small lapel pin in front of a blue background.

## ARTIFICIAL INTELLIGENCE

### Experts Warn AI Could Become Too Powerful for Humans to Control

AI experts warn that the rapidly advancing technology could eventually grow too powerful for human control.

- Artificial intelligence is increasingly simplifying daily activities. [local3news.com]

  > “Artificial intelligence is making everyday life easier.”

- Experts warn that AI technology might eventually exceed human control. [local3news.com]

  > “some of the people who understand AI best are warning that the technology could someday become too powerful for humans to control.”

- There is growing concern that AI could become uncontrollable earlier than anticipated. [local3news.com]

  > “And they worry that day may come sooner than we think.”

## SCIENCE AND TECHNOLOGY

# Proposed Discovery Compact Aims to Rebuild Science Funding and Public Trust

Sergio Carbajo and colleagues propose a new Discovery Compact to overhaul science funding, governance, and public infrastructure amidst modern challenges.

- Sergio Carbajo and colleagues have proposed a Discovery Compact to address the recent destabilization of the traditional postwar support system for basic research.

  [miragenews.com]

  > “Sergio Carbajo and colleagues call for a "Discovery Compact" in the face of the recent destabilization of the postwar compact for science”

- The authors advocate for treating science as a vital public infrastructure rather than just securing traditional funding.

  [miragenews.com]

  > “Science, the authors say, needs a new social contract, one with clear roles for government, research institutions, researchers, and the public.”

- Recommendations include multi-year funding, support for immigration and cross-training, and enhanced translation research policies.

  [miragenews.com]

  > “the authors call for predictable, multi-year funding with a view to preserving national research capacity as well as pathways for scientific rigor”

- The proposal concludes by inviting the United States to start developing this new national discovery compact.

  [miragenews.com]

  > “The Perspective concludes with an invitation to begin the process of developing such a compact for the United States.”

In the image: The image depicts a collaborative meeting or discussion with people gesturing around a laptop, adding a human element of brainstorming and discourse not captured in the policy text.

## EDUCATION

# Education Minister Urges Teachers to Embrace AI and Technology

Education Minister ANM Ehsanul Hoque Milon emphasized that teachers must master AI and technology to keep pace with digitally savvy students.

- Education Minister ANM Ehsanul Hoque Milon called on teachers to improve their technology and AI skills to match student proficiency.

  [thedailystar.net]

  > “urged teachers to deepen their knowledge of technology and artificial intelligence (AI) to keep pace with students”

- The minister highlighted the necessity of keeping up with tech changes for effective teaching during an orientation for new officials in Bogura. [thedailystar.net]

  > “Teachers must keep up with technological changes to ensure effective teaching, he said at the inauguration of an eight-day orientation course”

- Milon instructed educators to pay special attention to back-benchers and hesitant learners to ensure they get a chance to speak.

  [thedailystar.net]

  > “urged teachers to pay particular attention to students who sit on the back benches or hesitate to ask questions”

- A total of 613 newly appointed education cadre officials are set to participate in the eight-day orientation course. [thedailystar.net]

  > “613 newly appointed education cadre officials are scheduled to attend the course”
