THREE THINGS TO KNOW

1. GP Energy Tech showcased non-flammable nickel-zinc battery solutions for AI data centers.
2. Tom's Hardware launched a free official mobile app for iOS and Android devices.
3. Speciality chemicals startup Scimplify raised $25 million in funding led by Hitachi Ventures.

GP Energy Tech Showcases Nickel-Zinc Battery Solutions for AI Data Centers

The company presented its modular, non-flammable backup power technology designed to meet the growing infrastructure demands of artificial intelligence and cloud facilities.

- GP Energy Tech presented its Nickel-Zinc battery system at the Hong Kong Electronics Fair to target data center backup power needs. [jcnnewswire.com]
  > “is showcasing its Nickel-Zinc (NiZn) battery system at the Hong Kong Electronics Fair (Autumn Edition)”
- The NiZn battery design eliminates thermal runaway risk while significantly reducing floor space demands compared to lead-acid alternatives. [jcnnewswire.com]
  > “requiring 74% less floor space per MW than lead-acid systems.”
- The architecture is modular, stacking cylindrical Sub-C cells from individual packs into full cabinets. [jcnnewswire.com]
  > “Each pack contains 128 cells, with nine packs forming a module and ten modules integrated into a cabinet containing 11,520 cells.”
- Production resilience and allocation flexibility are supported by manufacturing operations across China and Malaysia. [jcnnewswire.com]
  > “strategy brings together manufacturing facilities in China and Malaysia to enhance flexibility in capacity allocation and strengthen supply resilience,”

TECHNOLOGY INDUSTRY

India's Homegrown Tech Hardware Brands Face Major Revenue Ceilings

A new joint study by India Mobile Congress and Techarc reveals that Indian-owned hardware brands capture just over Rs 60,000 crore annually.

- Homegrown consumer hardware brands in India have a combined annual revenue of just over Rs 60,000 crore, averaging Rs 465 crore per brand.

  [kashmirlife.net]

  > "their combined annual revenue stands at just over Rs 60,000 crore. This translates to an average revenue of merely Rs 465 crore per brand"

- The study introduces the TAME framework to explain growth ceilings across four phases: Trade, Assemble, Manufacture, and Engineer.

  [kashmirlife.net]

  > "the report introduces the TAME framework—an evolutionary progression tracking companies across four phases: Trade, Assemble, Manufacture, and Engineer."

- To achieve Viksit Bharat by 2047, the report targets building 50 homegrown hardware technology brands generating over Rs 1 lakh crore each annually.

  [kashmirlife.net]

  > "building 50 homegrown hardware technology brands that each generate more than Rs 1 lakh crore in annual turnover."

In the image: The image promotes the Viksit Tech 47 Report and IMC 2026 event featuring Techarc as the knowledge partner, alongside a laptop, mobile phone, and digital network graphics.

Tom's Hardware Launches Official Mobile App for iOS and Android

Tom's Hardware has released a free mobile app featuring personalized news feeds, smart search, and benchmark analysis tools for iOS and Android devices.

- The official Tom's Hardware app is now available for free download on both Android and iOS devices.

  [tomshardware.com]

  > "The official Tom's Hardware app is live now, available for free on Android and iOS devices"

- The app includes a smart search feature and allows users to personalize their news feeds and bookmark articles. [tomshardware.com]

  > "The smart search feature allows you to quickly search through the thousands of deep-dive articles"

- Users can access the Bench benchmark analyzer tool to compare internal lab-tested component data.

  [tomshardware.com]

  > "We've also brought the functionality of Bench, our benchmark analyzer tool that allows you to quickly compare"

- Subscribers to Tom's Hardware Premium can unlock unlimited use of the Bench tool and access longer-form content.

  [tomshardware.com]

  > "you can unlock unlimited use with a subscription to our Tom's Hardware Premium service"

In the image: The image showcases the app's user interface displaying

news feeds and hardware reviews across three smartphones, highlighting the visual layout not described in the text.

STARTUPS AND VENTURE CAPITAL

Kj-venture LLC Expands Alternative Funding and Real Estate Initiatives

Kj-venture LLC has announced an expansion of its alternative funding, digital growth, and real estate development initiatives, led by founder Brent Felix.

- Kj-venture LLC announced an expansion of its alternative business funding, digital growth, and real estate development initiatives in Scottsdale. [manilatimes.net]

  > "Kj-venture LLC, the Scottsdale-based business capital and growth firm owned by entrepreneur and business executive Brent Felix, today announced the expansion of its alternative business funding"

- Over the past six years, Brent Felix has helped facilitate and secure more than $30 million in funding for clients. [manilatimes.net]

  > "Felix has helped facilitate and secure more than $30 million in funding for clients across a wide range of financial and credit profiles"

- The expansion includes the Digital Authority & Capital Growth Program connected to multifamily development in San Diego. [manilatimes.net]

  > "rollout of the Digital Authority & Capital Growth Program connected to multifamily development in the San Diego market"

- KJ Development Group focuses on multifamily communities ranging from 46 to 90 units with a track record of 10 case studies without reported losses. [manilatimes.net]

  > "concentrates on multifamily communities ranging from approximately 46 to 90 units, combining marketing, investment strategy, and ground-up development"

In the image: The image shows a portrait of entrepreneur Brent Felix in a light gray polo shirt against a plain white background, which is not mentioned in the source text.

Texas Entrepreneurs Drive Billions in Economic Activity and Jobs

A surge in entrepreneurship across Texas and the U.S. is creating jobs, boosting local economies, and leveraging new technologies like AI to reach global markets.

- American businesses on Shopify generated massive economic activity and supported millions of jobs. [eaglesanantonio.com]

  > "American businesses on Shopify generated $688 billion in economic activity in the last year, supporting 2.3 million jobs"

- Texas entrepreneurs have made a significant contribution to both jobs and economic output. [eaglesanantonio.com]

  > "More than 161,000 of those jobs come from right here in Texas."

- Technological advancements have made starting a business much more accessible for modern entrepreneurs. [eaglesanantonio.com]

  > "Now 78% of entrepreneurs build their own store, and 41% launch with just one product"

In the image: The image features a colorful collage of financial charts, bar graphs, and statistical percentages highlighting business growth.

Speciality Chemicals Startup Scimplify Raises $25 Million in Funding

Bengaluru-based Scimplify has raised $25 million in a funding round led by Hitachi Ventures to expand its research and manufacturing operations in the United States.

- Scimplify raised $25 million in a funding round led by Hitachi Ventures. [economictimes.indiatimes.com]

  > "Speciality chemicals manufacturer Scimplify has raised $25 million in a funding round led by Hitachi Ventures"

- The company plans to invest about $10 million in the US over the next two years. [economictimes.indiatimes.com]

  > "plans to invest around $10 million over the next two years in the US"

- The expansion focuses on the advanced materials market used in semiconductors, batteries, and critical minerals. [economictimes.indiatimes.com]

  > "expand its presence in the market for advanced materials, which are used in semiconductors, batteries and critical minerals."

In the image: The image shows a jar of coins alongside stacked coins with growing plants, symbolizing financial growth and startup investment, which is not mentioned in the text.

Goldman Sachs Honors Capitolis CEO Gil Mandelzis as Exceptional Entrepreneur

Goldman Sachs recognized Gil Mandelzis at its Builders and Innovators Summit in California for his leadership at financial technology company Capitolis.

- Before founding Capitolis, Mandelzis created Traiana, a post-trade processing company that was acquired by ICAP for $250 million in 2007. [saultstar.com][thewhig.com]

  > "Under his leadership, Traiana grew from a start-up into a recognized global leader, culminating in its $250 million acquisition by ICAP (NEX Group) in 2007."

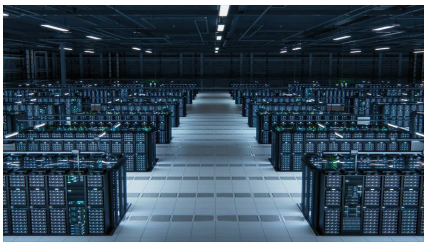

- David Solomon, Chairman and CEO of Goldman Sachs, praised Mandelzis and Capitolis for demonstrating agility and vision as artificial intelligence reshapes the global landscape. [saultstar.com] [thewhig.com]

  > "As AI reshapes the global landscape, the leaders at Capitolis are proving that agility and vision can be the ultimate competitive advantages."

Marvell Technology Poised for a Breakout in 2027

Driven by custom silicon and optical networking, Marvell Technology is emerging as a major player in AI infrastructure alongside Nvidia and Micron.

- Marvell Technology focuses on custom silicon and high-speed connectivity rather than competing directly with Nvidia or Micron. [fool.com]

  > “Marvell isn't trying to replace Nvidia's GPUs or compete with Micron's memory solutions.”

- In March, Nvidia invested $2 billion in Marvell to integrate custom AI processors with Nvidia's ecosystem. [fool.com]

  > “Back in March, Nvidia invested $2 billion in Marvell. The deal helped establish a strategic partnership”

- Alphabet's expanding relationship with Marvell includes warrants tied to potential chip purchases through fiscal 2033. [fool.com]

  > “Google received warrants tied to as much as $120 billion in potential chip purchases through fiscal 2033.”

In the image: The image shows a massive, dimly lit data center floor filled with rows of advanced server racks and high-speed networking infrastructure, illustrating the vast scale of physical hardware that custom silicon and interconnect technologies support.

Predictiv AI Launches Flockentis Fleet Decision Engine

Predictiv AI has introduced Flockentis, an AI-powered fleet decision engine developed by Shift Technologies Canada, with a proof of concept currently underway in the United Kingdom.

- A proof of concept is currently underway with a commercial fleet operator in the United Kingdom to evaluate the technology. [finanznachrichten.de] [californiatelegraph.com]

  > “A proof of concept ('POC') is underway with a commercial fleet operator in the United Kingdom, marking an international evaluation of this Canadian AI technology.”

- Flockentis evaluates more than ten different operating considerations, including operating cost, distance, driver workload, and estimated emissions. [finanznachrichten.de] [californiatelegraph.com]

  > “It evaluates more than 10 considerations, including operating cost, distance, delivery punctuality, job priority, driver workload, legal driving hours and mandatory breaks, vehicle health, capacity, cargo compatibility, hazardous-goods requirements, safety and estimated emissions.”

- The engine allows operators to submit up to 5,000 jobs per planning cycle and generate three alternative

operating plans.

[finanznachrichten.de]

[californiatelegraph.com]

> “Operators can submit up to 5,000 jobs per planning cycle. Flockentis can generate three alternative operating plans - Plan A, Plan B and Plan C”

CRIME, LAW AND JUSTICE

PRESS & DAKOTAN

Law School Curricula Face Scrutiny Over Criminal Law Disparity

A retired law professor argues that modern law school requirements do not reflect the overwhelming dominance of criminal cases in the justice system.

- Criminal cases make up the vast majority of filings in South Dakota State Court, accounting for nearly 69 percent of the total.

  [yankton.net]

  > “68.9% of the cases filed in South Dakota State Court were criminal”

- The University of South Dakota School of Law requires only six credit hours out of ninety to be devoted to criminal law and procedure. [yankton.net]

  > “only 6 of 90 required credit hours are devoted to Criminal Law and Criminal Procedure”

- Federal court statistics show that criminal cases made up over ninety percent of all jury trials in the District of South Dakota in 2024.

  [yankton.net]

  > “slightly more than 90% of all jury trials in the District of South Dakota were criminal cases.”

In the image: The image displays the Press & Dakotan newspaper logo, which is not mentioned in the text.

Milky Way Planetary Systems Belong to Two Distinct Families, Study Finds

Astronomers have discovered that a star's properties dictate whether its planetary system evolves into a compact arrangement or a wide, unstable configuration.

- Researchers analyzed hundreds of multiplanet systems to uncover fundamental structural differences across the galaxy. [space.com]

  > “studied 300 of the best-understood multiplanet systems of the over 1,000 that astronomers have discovered in the Milky Way.”

- A host star's intrinsic characteristics create a direct genetic connection that shapes the evolutionary path of its planets. [space.com]

  > “Our results show that there is a genetic link between planetary systems and their stars”

- The first family consists of wide and massive planetary systems centered around host stars more massive than the Sun. [space.com]

  > “The planets in these systems orbit stars more massive than the sun with lower concentrations of elements heavier than hydrogen and helium”

- Evolutionary simulations revealed that wide, massive planetary systems tend to be dynamically unstable from birth. [space.com]

  > “The scenarios that best reproduce the dynamical properties of the family of wide and massive systems are those in which the systems are unstable from birth”

In the image: The diagram illustrates the two evolutionary pathways originating from a central star-forming nebula, showing a smaller star giving rise to a compact system with multiple small planets on the left, and a larger star evolving into a wide system with gas giants on the right.
