Can Apple Overtake Nvidia as the World's Largest Company?

Apple and Nvidia compete closely for the title of the world's largest company, with valuation and growth rates sparking investor debate.

- Apple is approaching the $5 trillion valuation mark while Nvidia trades at slightly under $5.5 trillion. [aol.com]

  > “Apple is about ready to cross the $5 trillion valuation threshold, while Nvidia has faltered a bit in recent days and is valued at just under $5.5 trillion.”

- Apple reported a 16% revenue growth in its latest quarter, whereas Nvidia achieved 106% growth. [aol.com]

  > “In its most recent quarter, it grew revenue by 16%. That's not bad, but it doesn't hold a candle to the 106% growth Nvidia delivered”

- Apple's capital expenditures have decreased recently, totaling only $10 billion over the past year. [aol.com]

  > “Over the past 12 months, Apple's capital expenditures have totaled a mere $10 billion.”

- Nvidia expects to achieve 70% revenue growth next year according to its recent conference call. [aol.com]

  > “In its most recent conference call, Nvidia informed investors that it expects 70% revenue growth next year.”

Meet Alex Zhou: Building a $3 Billion Startup for Robotic Hands

Alex Zhou founded the Chinese robotics startup Linkerbot to develop advanced, human-like robotic hands capable of performing complex industrial and everyday tasks.

- Alex Zhou founded Linkerbot in 2023 with the objective of creating robotic hands that execute diverse tasks rather than just gripping objects.

  [educationtimes.com]

  > "In 2023, Zhou founded Linkerbot with a clear goal: to develop robotic hands that can perform a wide range of tasks instead of simply gripping objects."

- Linkerbot reached a valuation of $3 billion following a funding round in April. [educationtimes.com]

  > "According to Forbes, Linkerbot was worth $3 billion after an April funding round."

- Founder Alex Zhou's net worth is estimated at approximately $920 million due to his 31% stake in Linkerbot. [educationtimes.com]

  > "The report pegged the net worth of founder Alex Zhou at approximately $920 million, based on his 31% stake in the company."

- Linkerbot shipped over 10,000 robotic hands in 2025, establishing itself as China's second-largest

producer of the devices by shipments. [educationtimes.com]

> “The Gaogong Industry Research Institute reported Linkerbot shipped over 10,000 robotic hands in 2025 and was China's second-largest producer of the devices by shipments”

In the image: Alex Zhou inspecting a robotic hand prototype closely inside a brightly lit facility surrounded by other robotic hands and arms.

Workday Co-Founder Aneel Bhusri Returns as CEO to Navigate AI Era

Inspired by Steve Jobs, Aneel Bhusri reclaimed the CEO seat at Workday to drive AI innovation and initiate a company refounding.

- Prompted by cofounder Dave Duffield, Bhusri returned to the CEO position in February to lead Workday's refounding chapter. [fortune.com]

  > “In February, at the nudging of his cofounder Dave Duffield, Bhusri reclaimed the CEO seat at Workday and began the company’s “refounding” chapter.”

- Bhusri studied Steve Jobs' return to Apple extensively and adopted a startup mindset focused on accountability and streamlined offerings. [fortune.com]

  > “Bhusri studied the Steve Jobs return playbook extensively before his February restart. He says he drove his management team crazy by sending them Instagram clips”

- As part of his initial moves, Bhusri reduced Workday's offered AI agents from 50 to 20 and eliminated non-core projects. [fortune.com]

  > “one of Bhusri’s first moves was to cut the number of AI agents Workday offered from 50 to 20, while also eliminating projects”

In the image: The image shows Aneel Bhusri wearing an Allen & Company vest and a conference name tag, which is not mentioned in the text.

Komprise Survey Reveals Wide Gap Between AI Maturity and ROI

A new survey by Komprise highlights that while most enterprises consider themselves mature in AI, the vast majority struggle with unstructured data readiness and low ROI.

- Enterprise organizations largely report being maturing or mature with artificial intelligence. [manilatimes.net]

  > "Enterprise organizations say they are largely maturing or mature with AI (68%)"

- Only a small fraction of organizations have successfully quantified return on investment from AI programs. [manilatimes.net]

  > "only 28% of organizations on average have quantified ROI from AI."

- The vast majority of organizations report that their unstructured data is unprepared for AI and lakehouses. [manilatimes.net]

  > "93-96% of organizations report that most of their data is not ready for AI and lakehouses."

- Key challenges in data preparation involve finding project-appropriate data and removing low-quality or duplicate files. [manilatimes.net]

  > "Top pain points for AI data readiness include finding the right data for a project and cleaning up low quality and duplicate data"

In the image: The image shows the logo of The Manila Times newspaper and its official website domain.
