ARTIFICIAL INTELLIGENCE

Character.ai Files for Chapter 11 Bankruptcy Following Reverse Acquihire

After Google hired away its founders and licensed its tech, Character.ai faced mounting litigation, financial struggles, and bankruptcy.

- Character.ai allowed users to interact with AI-powered companions and reached 28 million monthly active users at its peak. [tspr.org][kazu.org]

  > “Character.ai is a company that allows you to speak with a "companion" — an AI-powered fictional character, historical figure, or whatever you decide to build.”

- Google hired away Character.ai's founders and licensed its technology without buying the company itself in a reverse acquihire. [tspr.org][kazu.org]

  > “Instead, they hired away the founders (and other big hitters on the team) and bought the nonexclusive license to the technology, leaving the company itself behind.”

- Character.ai is filing for Chapter 11 bankruptcy after facing litigation over harm to minors and copyright issues with Disney. [tspr.org] [kazu.org]

  > “Character.ai faced a mountain of litigation over alleged harm to minors plus copyright concerns from Disney.”

TECHNOLOGY INDUSTRY

US Stock Indexes Mixed as Tech Sector Weighs on Market

A broad sell-off in technology companies pulled Wall Street lower, capping the market's worst week since late June.

- The S&P 500 fell 1.1% and wiped out gains from the previous week.

  [capitalgazette.com]

  > "The S&P 500 fell 1.1%. Its roughly 2% drop for the week wiped out its gains from last week, when it set an all-time high."

- The Nasdaq composite sank 2.1% due to heavy weighting in technology stocks.

  [capitalgazette.com]

  > "The Nasdaq composite, which is heavily weighted with technology stocks, sank 2.1% and posted its first weekly loss in five weeks and its worst since June."

- The Dow Jones Industrial Average held up better than other indexes, closing down 0.3%. [capitalgazette.com]

  > "The Dow Jones Industrial Average held up better, closing 0.3% lower."

- Chip companies saw major declines, reflecting investor worries about AI buildout frenzy duration.

  [capitalgazette.com]

  > "Among the biggest decliners were chip companies, reflecting mounting worries about how long the frenzy over the AI buildout will last."

Silicon Valley Embraces the AI Boom Amid Bubble Concerns

At San Francisco Tech Week, tech workers and investors expressed excitement and anxiety over soaring AI valuations and job market shifts.

- Tech Week brought together startup founders, investors, and workers for hundreds of events across San Francisco.

  [ksmu.org]

  > "Tech Week is a citywide festival of sorts. Hundreds of events spread around the city, bring together startup founders, investors and tech workers."

- Participants noted that the current climate feels both exciting and scary, with massive amounts of money flooding into AI. [ksmu.org]

  > "It's very sort of hot and, like, exciting and scary at the same time, right? Like, a lot of this doesn't make sense."

- Disruption in the job market has made entry-level tech roles difficult to find, leading many to pursue entrepreneurship instead.

  [ksmu.org]

  > "One of the sad truths about why so many people are trying to be entrepreneurs and seeing that as a viable career path is so many other career paths are no longer accessible to them."

- Some investors worry that the heavy speculation around AI could resemble a dot-com style economic bubble. [ksmu.org]

> “The big risk he sees is the possibility that this is all a bubble, like the dot-com bust around the year 2000 when speculative investment in internet companies dried up.”

Iridium and Altair Partner to Integrate Satellite Connectivity into IoT Chipsets

Altair Semiconductor is integrating Iridium NTN Direct capability into its ALT1350 and ALT1550 IoT chipset platforms to extend connectivity beyond terrestrial networks.

- Iridium Communications announced that Altair Semiconductor is integrating Iridium NTN Direct capability into its IoT chipset platforms.

  [thefastmode.com]

  > “Altair Semiconductor, a world leader in cellular IoT chips, is integrating Iridium NTN Direct℠ capability into Altair's ALT1350 and next-generation ALT1550 IoT chipset platforms.”

- The integration allows terrestrial cellular IoT and Iridium satellite connectivity to exist on a single chipset without adding a separate modem. [thefastmode.com]

  > “device manufacturers, module makers and mobile network operators (MNOs) will be able to extend IoT connectivity beyond the reach of terrestrial networks through the Iridium satellite network, without adding a separate satellite modem to their designs.”

- The ALT1350 chipset supports requirements such as asset tracking, logistics, smart metering, agriculture, and industrial monitoring.

  [thefastmode.com]

  > “With the ultra-low-power ALT1350, these connectivity requirements can include asset tracking, logistics, smart metering and utilities, agriculture, vehicle telematics, industrial monitoring and remote infrastructure.”

- The ALT1550 chipset extends capabilities to AI-powered 5G eRedCap devices like smart glasses and wearables.

  [thefastmode.com]

  > “With the ALT1550, these capabilities extend to a new generation of AI-powered 5G eRedCap devices, such as smart glasses, AI assistants and other wearables, that need to stay connected wherever they go.”

In the image: The image illustrates a futuristic city grid overlaid with glowing circuit-like connection pathways and diverse technological icons, visually representing the concept of ubiquitous IoT and smart city connectivity.
