THREE THINGS TO KNOW

1. Russian strikes hit Ukrainian power plants shortly after Donald Trump claimed an energy ceasefire agreement.
2. Google and Constellation Energy signed a 20-year nuclear power contract to supply AI data centers.
3. Global ocean temperatures reached record highs in September 2026 amid persistent El Niño conditions.

Trump Declares Energy Ceasefire Between Russia and Ukraine as Strikes Continue

Russian strikes hit Ukrainian power plants shortly after Donald Trump claimed both nations agreed to halt attacks on energy infrastructure.

- Donald Trump announced an immediate bilateral energy ceasefire on his Truth Social platform without providing additional details. [newindianexpress.com][news.antiwar.com]

  > “effective immediately, there is an ENERGY CEASEFIRE in the War between Russia and Ukraine.”

- Ukrainian power plants in Kyiv and Kharkiv were struck by Russian drones despite Trump's announcement. [newindianexpress.com]

  > “Russian strikes hit multiple Ukrainian power plants on Sunday after US President Donald Trump's claim”

- Ukrainian President Volodymyr Zelensky expressed surprise at the announcement, while the Kremlin has not confirmed any agreement. [newindianexpress.com][news.antiwar.com]

  > “Zelensky expressed surprise at the announcement and said he was seeking further details, while Russia has yet to confirm its agreement.”

- The declaration followed a controversial move by Trump to ease sanctions on Russian diesel amid soaring fuel prices. [article.wn.com][newindianexpress.com]

  > “The announcement came two days after Trump announced a temporary easing of US sanctions on Russian diesel”

ENERGY

Google Signs 20-Year Nuclear Deal to Power AI Data Centers

Google and Constellation Energy have agreed to a 20-year nuclear power contract to supply massive energy needs for AI data centers.

- Google and Constellation Energy announced a 20-year nuclear power agreement covering 11 reactors.

  [breitbart.com]

  > "Google and Constellation Energy announced a 20-year nuclear-power agreement this week that will boost output at 11 existing reactors"

- The agreement centres on an 890-megawatt power-purchase arrangement with significant investments planned. [breitbart.com]

  > "The deal centers on an 890-megawatt power-purchase agreement. Upgrades at the plants amount to adding a new large reactor to the grid"

- Google secured an additional 15-year supply deal for 2,700 megawatts in the PJM power market.

  [breitbart.com]

  > "Google and Constellation also struck a separate 15-year supply deal for an additional 2,700 megawatts of electricity in the PJM power market"

- Constellation chief executive Joe Dominguez praised Google for providing the necessary financial backing.

  [breitbart.com]

  > "it's really Google stepping up to the plate and providing the financial backing for us to be able to bring on what is effectively a new reactor."

Pakistan Plans Targeted Energy Subsidies to Cut Circular Debt

Starting in 2027, Pakistan will replace existing energy subsidies with a targeted system linked to Benazir Income Support Programme records.

- A new electricity subsidy framework is scheduled to start in January 2027, with revised gas subsidies following on July 1.

  [pakistantimes.com]

  > "A new electricity subsidy system is planned for January 2027, followed by revised gas subsidies from July 1."

- The reforms are designed to replace current subsidy models and ease the energy sector's circular debt.

  [pakistantimes.com]

  > "The proposed reforms aim to replace existing subsidy arrangements and reduce the energy sector's circular debt burden."

- Eligible households will be identified using a socioeconomic registry linked with BISP core records. [pakistantimes.com]

  > "Once the information has been collected and verified, it will be linked to the Benazir Income Support Programme's core records."

In the image: The image illustrates electricity and gas meters alongside a burning stove, symbolizing household energy use under the reform plans.

Petrojam Forecasts Stable Fuel Prices for Jamaica Through Year-End

Petrojam General Manager Danville Walker stated that increased oil production in the Middle East will help contain local fuel prices for the remainder of 2026.

- Danville Walker projected that Jamaica will experience stable fuel supplies and relatively contained price movements for the rest of 2026. [jamaica-gleaner.com]

  > “Danville Walker, general manager of Petrojam Ltd, said Jamaica will likely see stable fuel supplies and relatively contained fuel-price movements through the remainder of 2026.”

- Walker explained that increased crude exports from the Middle East are helping to ease pressure on global oil markets.

  [jamaica-gleaner.com]

  > “That’s due to increased crude exports from the Middle East which are easing pressure on global oil markets.”

- Petrojam's billing price for 87-octane gasoline fell to J$209.62 per litre at the start of October.

  [jamaica-gleaner.com]

  > “Petrojam’s billing price for 87-octane gasoline stood at J$209.62 per litre on October 1, down from levels above J$220 earlier in the year”

- Walker assured the public that there is no risk of a fuel shortage in Jamaica.

  [jamaica-gleaner.com]

  > ““Absolutely there will be no shortage of fuel in Jamaica,” he said.”

September 2026 Records Second-Hottest Global Temperatures Amid Ocean Warming

Global ocean temperatures set a new record in September 2026 as persistent El Niño conditions contributed to extreme warmth and shrinking sea ice at both poles.

- September 2026 was the second-hottest September on record globally, with surface temperatures 1.33°C above the 20th-century average. [businesstoday.in]

  > "Global surface temperatures were 1.33°C above the 20th-century average"

- Global ocean surface temperatures averaged 1.10°C above the historical average, establishing a record for any month. [businesstoday.in]

  > "Ocean surface temperatures averaged 1.10°C above the historical average, setting a record for any month"

- Global sea ice extent dropped significantly, with Antarctic sea ice recording its third-smallest September extent in 48 years. [businesstoday.in]

  > "Antarctic sea ice recorded its third-smallest September extent in 48 years"

- Persistent El Niño conditions drove exceptional warmth across the tropical Pacific Ocean. [businesstoday.in]

  > "NOAA attributed much of the exceptional warmth across the tropical Pacific to persistent El Niño conditions"

In the image: The image shows a vibrant underwater coral reef ecosystem with a diver and abundant marine life, highlighting the marine environments impacted by rising ocean temperatures.
