SpaceX Warns of Rising Collision Risks in Crowded Earth Orbit

SpaceX highlights increasing satellite traffic and unannounced maneuvers as major orbital collision risks, urging stricter tracking and better data sharing.

- SpaceX reported having more than 11,000 satellites in low-Earth orbit and noted approximately 164,000 close calls over a recent six-month period. [wjcl.com]

  > "The company reported having more than 11,000 satellites in low-Earth orbit and revealed that it experienced approximately 164,000 close calls in the last six months"

- Michael Nicolls of Starlink stated that unannounced maneuvers by other operators make collisions difficult to avoid. [wjcl.com]

  > "What you can't avoid is other operators who maneuver without telling you where they're gonna go"

- Dr. Don Platt compared the crowded orbital environment to a busy highway where increased traffic leads to higher crash risks. [wjcl.com]

  > "The more traffic, the higher the risk of a crash"

- SpaceX is advocating for automated systems, improved communication, and the use of its Starlink Space Safety website to share flight data. [wjcl.com]

  > "SpaceX is advocating for better communication and automated

> systems to address these challenges and is urging other operators to use its Starlink Space Safety website to share flight data."
