New LSE research shows investors cannot solve climate change alone

A new LSE study reveals that early optimism around investors driving the net zero transition has given way to a complex landscape.

- Following the 2015 Paris Agreement, financial institutions increasingly pledged to align their portfolios with net zero targets. [lse.ac.uk]

  > "Financial institutions pledged to align portfolios with net zero targets, and investor coalitions driven by net zero aims rapidly expanded."

- Professor Tom Gosling notes that global targets are unlikely to be met as the world is not on a 1.5°C trajectory. [lse.ac.uk]

  > "It has become increasingly clear that the world is not on a trajectory of 1.5°C"

- BP previously announced a pivot towards renewables before unprofitability forced a U-turn back to oil drilling. [lse.ac.uk]

  > "In 2022 BP announced it would pivot towards renewables, going "further than any of the current kind of oil majors", before unprofitability forced a U-turn."

- The central conclusion of the LSE report is that investors cannot lead the transition to net zero. [lse.ac.uk]

  > "The central conclusion of the report is both simple and controversial: investors cannot lead the transition to net zero."

World Food Day Highlights Global Hunger and Massive Waste

As the United Nations marks World Food Day, millions face hunger worldwide while over a billion tonnes of food are wasted annually.

- Roughly one out of every five plates of food served globally ends up in the trash bin. [yourdemocracy.net.au]

  > “For every five plates of food served around the world, roughly one ends up in the bin.”

- An estimated 645 million people faced hunger globally in the year 2025.

  [yourdemocracy.net.au]

  > “an estimated 645 million people, or 7.8 percent of the world’s population, faced hunger in 2025.”

- Africa has more undernourished people than any other region, estimated at 309 million in 2025.

  [yourdemocracy.net.au]

  > “In 2025, an estimated 309 million people in Africa were undernourished.”

- Households are responsible for the largest share of consumer food waste at 60 percent. [yourdemocracy.net.au]

  > “Households account for the most, 60 percent, followed by restaurants and other food services at 28 percent and shops at 12 percent.”

In the image: The image features a political cartoon showing a garbage bin filled with a dollar sign, a champagne flute, and a large wooden spoon, alongside a distressed character and a text bubble claiming Australians waste more food than Russians.
